7. You can check the audit logs by clicking on audit log.

Summary

⚠ Created snapshot 'backup' with warnings.

Created snapshot containing **74** configuration elements and **2** issues with warnings. Detailed information is available in the [Audit Log](#).

⚠ There are filters that refer to objects not included in the snapshot. See the audit log for details.

Done

8. Once done click on done to complete.

The screenshot shows the Jira Administration interface. The top navigation bar includes 'Jira Software', 'Dashboards', 'Projects', 'Issues', 'Boards', and a 'Create' button. The left sidebar shows 'Administration' with a search bar and a list of options: Applications, Projects, Issues, Manage apps, User management, Latest upgrade report, System, and Configuration Manager. The main content area is titled 'Configuration Snapshots' and includes a '+ Create Snapshot' button. Below this is a table with columns: Name, Type, Issues, Date Created, Created By, Description, Details, and Actions. The table contains one row for a snapshot named 'backup' of type 'Project (first-project-task)' with 2 issues, created on 12/17/2019 at 1:15:39 PM by yuttarawar@altimetrik.com. The details show '74 elements, 2 issues' and an action icon.

Name	Type	Issues	Date Created	Created By	Description	Details	Actions
backup	Project (first-project-task)	2 issues	12/17/2019, 1:15:39 PM	yuttarawar@altimetrik.com		74 elements, 2 issues	

Importing:

1. Login to JIRA
2. Go to “configuration manager” option under “Atlassian market places”
3. Click “deploy” option.
4. Select appropriate option.

The screenshot shows the 'Deploy Configuration Snapshot' page in the Jira Administration interface. The top navigation bar is the same as the previous screenshot. The left sidebar shows 'Administration' with a search bar and a list of options: Applications, Projects, Issues, Manage apps, User management, Latest upgrade report, System, and Configuration Manager. The main content area is titled 'Deploy Configuration Snapshot' and includes three tabs: 'From Current Instance', 'From Linked JIRA Instance', and 'From Snapshot File'. Below the tabs is a table with columns: Name, Type, Issues, Date Created, Created By, Description, Details, and Actions. The table contains one row for a snapshot named 'backup' of type 'Project (first-project-task)' with 2 issues, created on 12/17/2019 at 1:15:39 PM by yuttarawar@altimetrik.com. The details show '74 elements, 2 issues' and an action icon labeled 'Deploy'.

Name	Type	Issues	Date Created	Created By	Description	Details	Actions
backup	Project (first-project-task)	2 issues	12/17/2019, 1:15:39 PM	yuttarawar@altimetrik.com		74 elements, 2 issues	Deploy

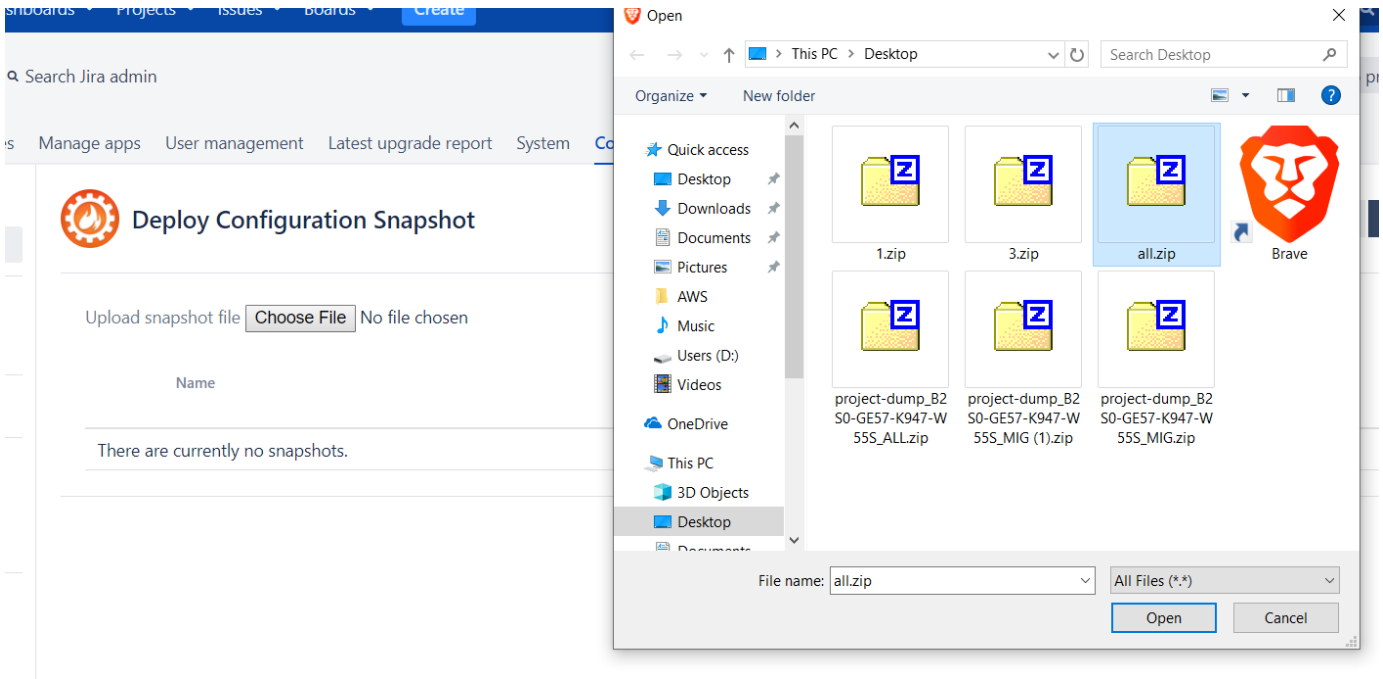

5. In this we are using “from Snapshot” file option.

The screenshot shows the 'Deploy Configuration Snapshot' page in the Jira Administration interface. The top navigation bar is the same as the previous screenshot. The left sidebar shows 'Administration' with a search bar and a list of options: Applications, Projects, Issues, Manage apps, User management, Latest upgrade report, System, and Configuration Manager. The main content area is titled 'Deploy Configuration Snapshot' and includes three tabs: 'From Current Instance', 'From Linked JIRA Instance', and 'From Snapshot File'. Below the tabs is a section for uploading a snapshot file, with a 'Choose File' button and the text 'No file chosen'. Below this is a table with columns: Name, Type, Issues, Date Created, Created By, Description, Details, and Actions. The table is currently empty, with the text 'There are currently no snapshots.' displayed below it.

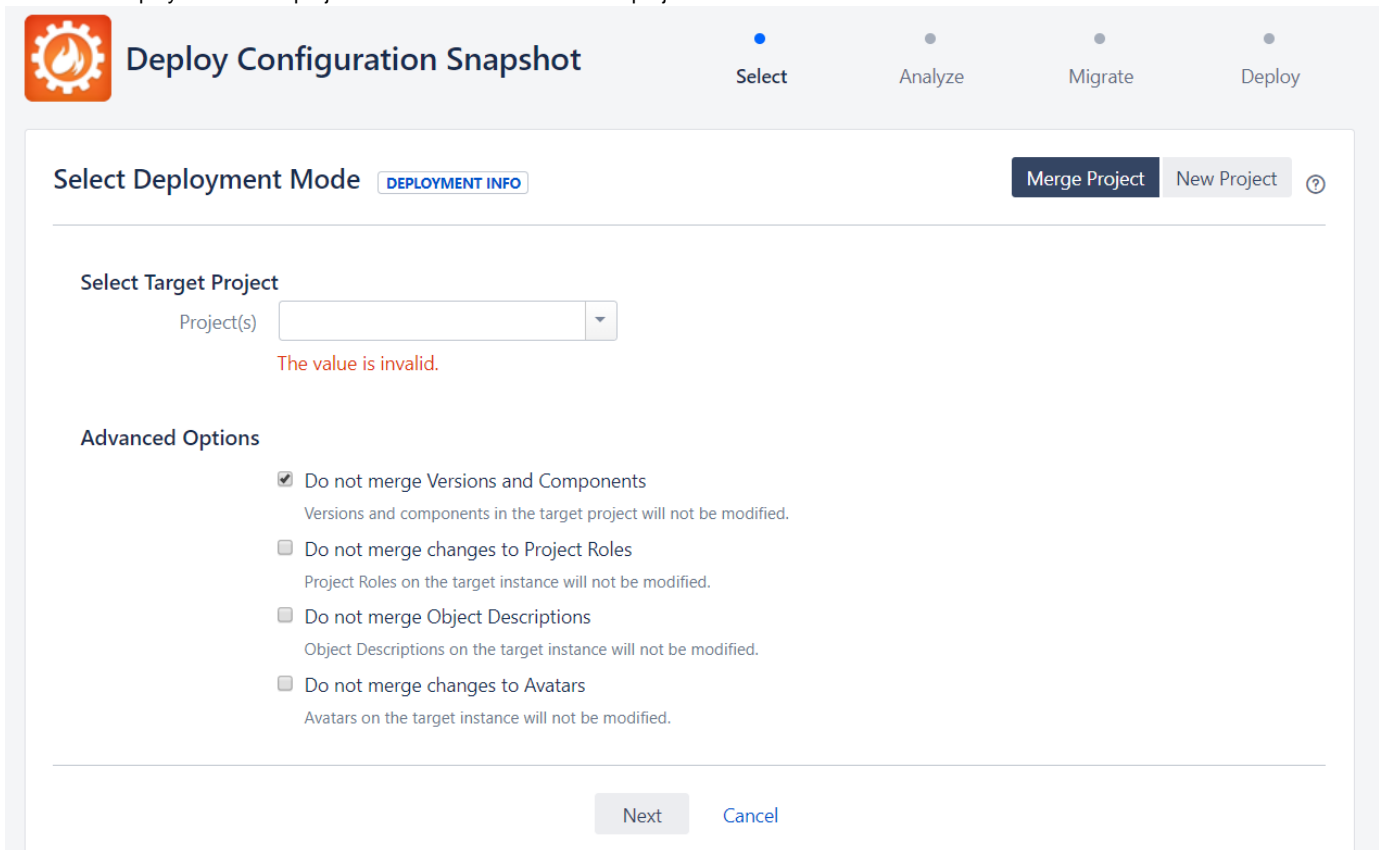

Name	Type	Issues	Date Created	Created By	Description	Details	Actions
------	------	--------	--------------	------------	-------------	---------	---------

There are currently no snapshots.

6. Click on choose file to select snapshot file.

7. Click on “deploy” and select project name or we can create new project.

8. Select appropriate check boxes and click on next.

9. Read all options and click on next.

10. Once all process is done click on done.

Edit your project's workflows and screens

If your workflows or screens are only used by you, the way your team works. Go to [workflows](#) or [screens](#) to make any changes you may want. Check out our [documentation](#) for more information.

Issue types

These issue types are available in your project. Each issue type can be configured differently.

Scheme:
MIG: Project Management Issue Type Scheme

Sub-task

Task

Workflows

A workflow defines which statuses and transitions an issue can use within a project.

14. Go back to project to view issue.. etc.
