

Jfrog Artifactory- Jenkins Integration:-

In this document; steps were mentioned for the basic jfrog configurations and maven project artifacts upload using Jenkins builds.

1. jfrog artifactory configurations-

1. Open the Novartis Nexus URL "<http://novartis.devops.altimetrik.io:8081/>"
2. Login with credentials and Dashboard will be loaded.
3. You can able to see the dashboard like below pics.

Novartis.devops.altimetrik.io:8081/artifactory/webapp/#/artifacts/browse/tree/General/cran

2. jenkins artifactory configurations-

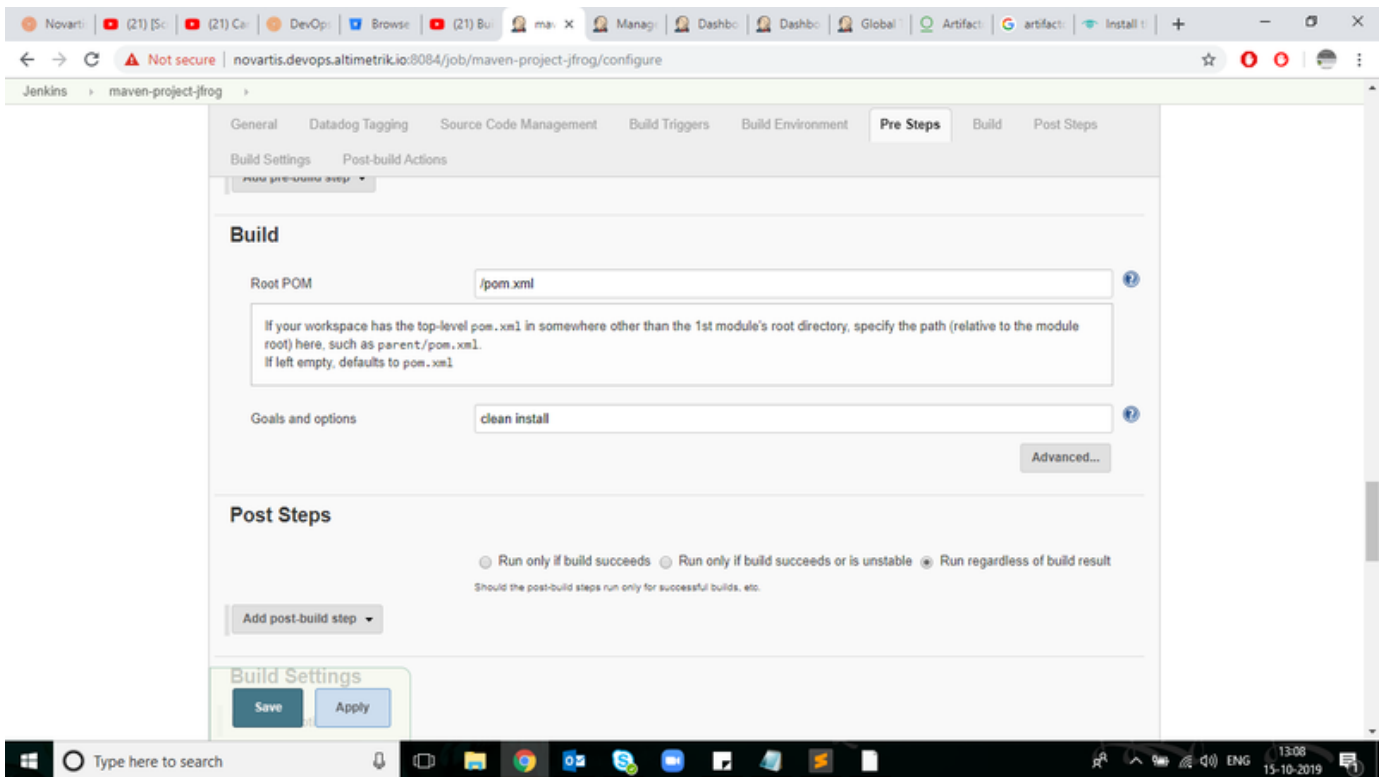

1. go to jenkins instances and login with credentials and try to create a maven based project.
2. go to manage sections manage plugins install artifactory.
3. go to configure tools sections and add the jfrog artifactory credentials and instance url like below.

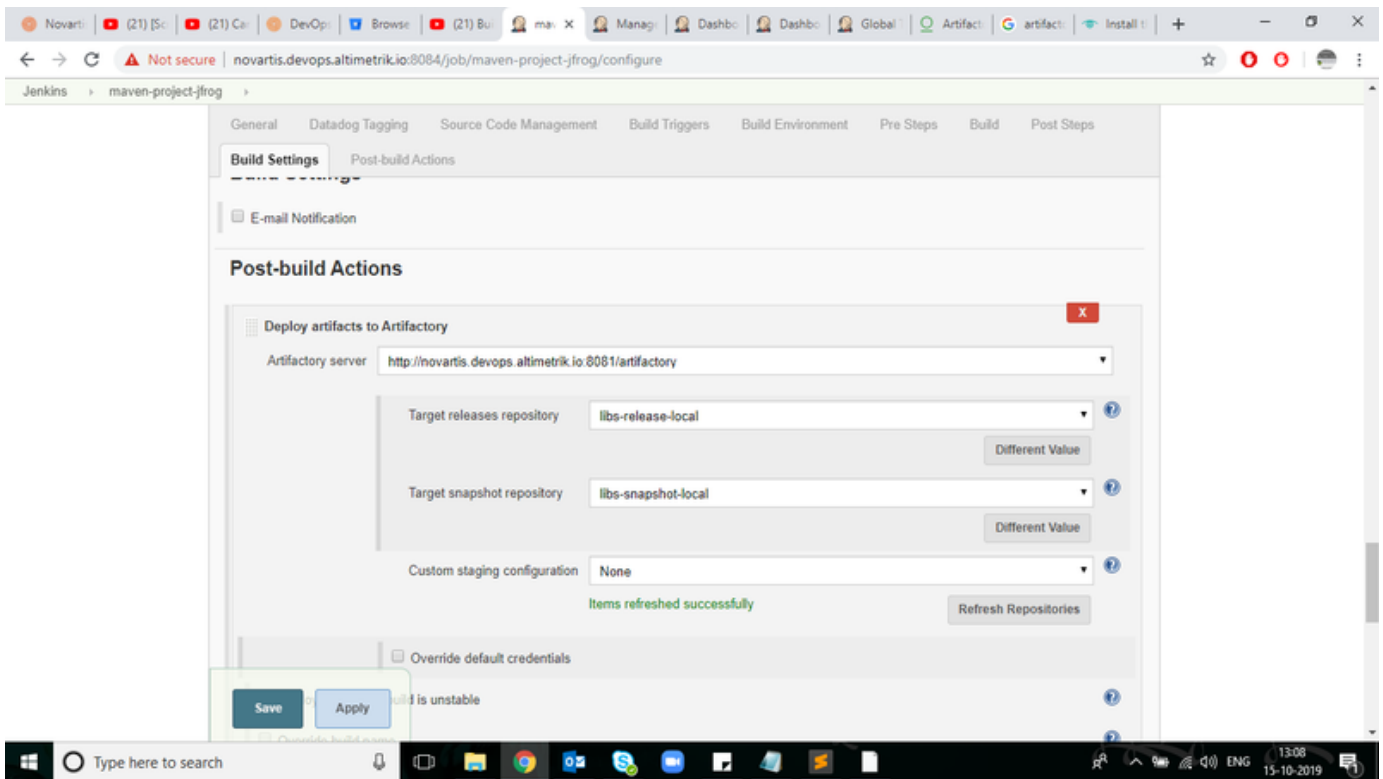

4. create a maven project and give the configurations as below source code, build environment, build steps as below,

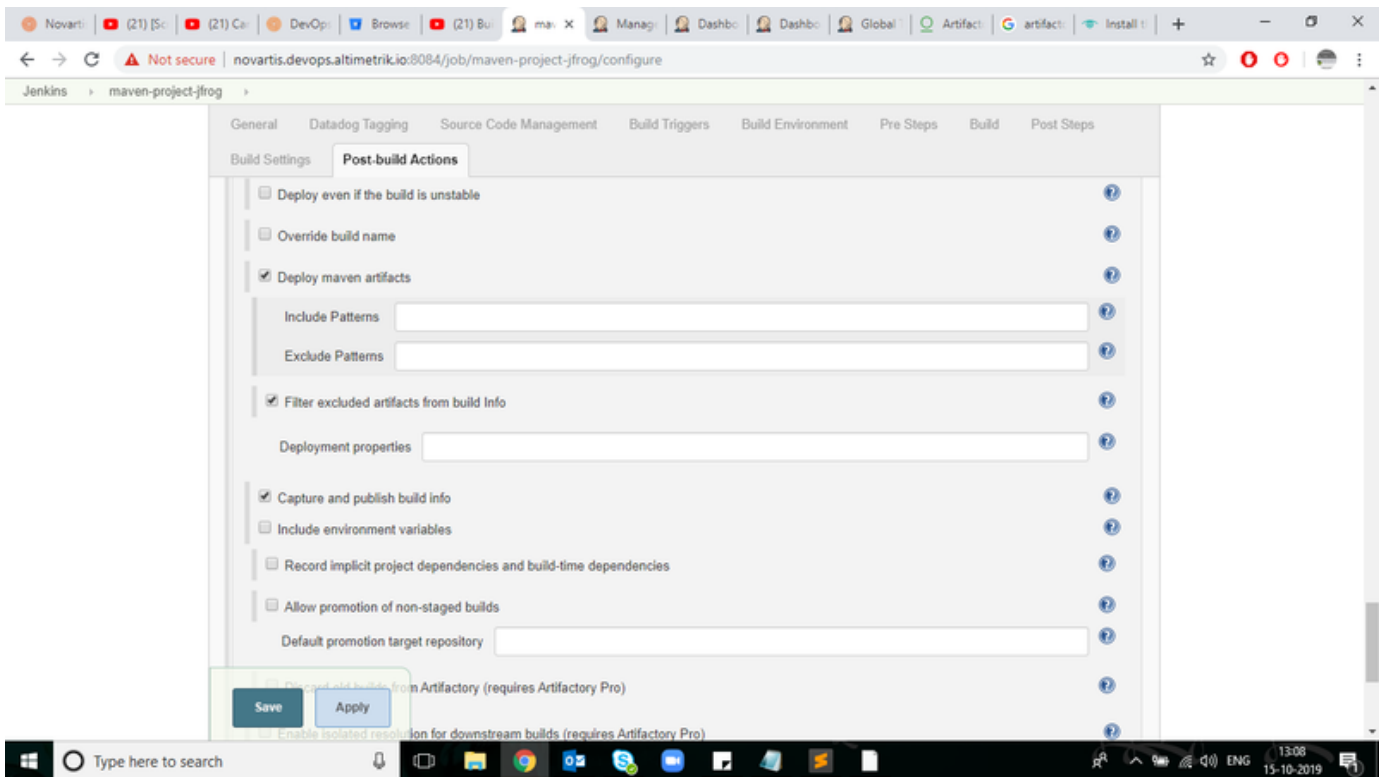

5. add the build step as below

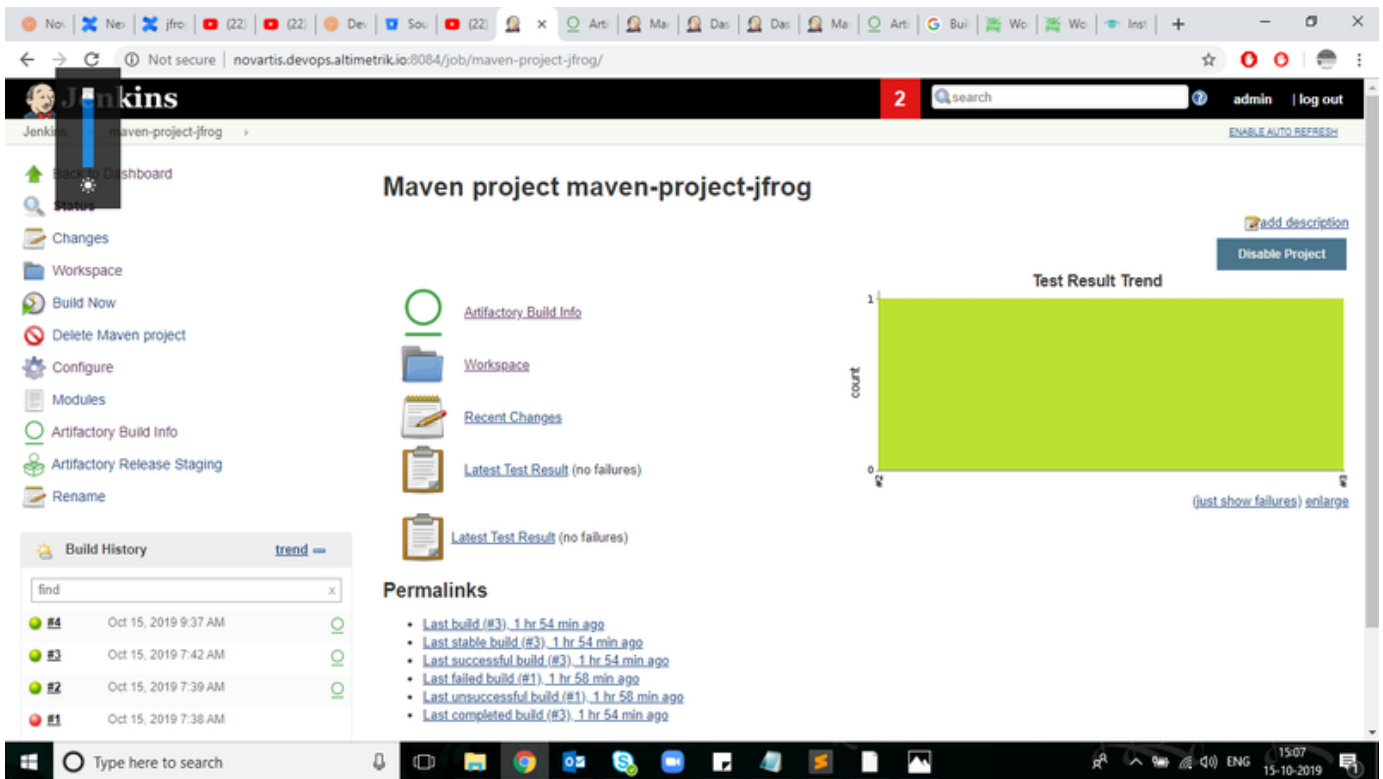

6.now the build is completed now try to publish the Jfrog artifactory in post-build actions section.

7. now try to build the maven project as below and you can observe the jar files in jfrog artifactory.

8. try to build again the maven project, then you can see the new build is deployed in Jfrog, see the below pics.

9. go to the Jfrog artifactory and see the artifacts in the build section.
